

Marking Tickets Reviewed

Marking Tickets Reviewed: Ticket Home

Click on Reviewed

The screenshot shows the 'Ticket Home' interface. At the top, there's a header with a menu icon, the title 'Ticket Home', an 'Auto refresh' toggle, a 'Refresh Now' button, and an 'Advanced Filters' button. Below the header, there are filter toggles for 'Concerns polling place', 'Un-reviewed Only', 'Reviewed Only', and 'Hide question-only'. The main content area displays a ticket card for 'Example' with a status of 'UNASSIGNED' and 'CLOSED'. The ticket card has a 'Reviewed' button circled in orange. Below the ticket card, there are two callout boxes: one pointing to the 'Reviewed' button with the text 'Use QC Problem while fixing any problems', and another pointing to a down arrow icon with the text 'Click on Down Arrow to expand ticket notes'. A third callout box points to the ticket card with the text 'Click anywhere in ticket to open fully'.
